

zebotec GmbH has been successfully active in the renewable energy market for over 20 years and is one of the leading system integrators for the control and monitoring of photovoltaic power plants. Since 2020, zebotec has been part of the BayWa r.e. Group, under whose roof various companies from the field of renewable energies have been brought together since 2009.

With our many years of experience and PV expertise, we support our customers from the solution concept to on-site commissioning. Individual projects require extensive engineering, complex software development and customer-oriented service.

To support our team we are looking for a

working student project management (m/f/d) energy and automation technology

Your tasks

- Support of the project manager in the daily tasks and processing of work packages

Your profile

- Student in industrial or electrical engineering or comparable
- Structured approach to understanding complex processes
- A high degree of independence and good communication skills
- Enthusiasm for renewable energies

We offer you

- Responsibility, flat hierarchies and short decision-making paths
- A varied job with flexible working hours and flexible home office rules
- Creative work in a modern company with growth potential
- International Projects
- Bachelor- and Master Thesis and Internships

Could we arouse your interest?

Then take the chance and apply now. We are always available for further questions.
